WEBINAR REPORT

Quantitative aptitude tests your mental alertness. A suitable candidate needs to be mentally alert to the changes happening around him/ her. A person having an aptitude for numbers will invariably have a sharp mind.

Logical reasoning tests are a form of psychometric testing and are also widely used by corporate employers to help assess candidates during their recruitment process. 'Psychometric' is just a fancy way of saying 'measuring mental ability' and logical reasoning tests are designed to measure candidate's non-verbal skills.

A high profile employee/manager or student struggles with challenges every minute. A major part of his/ her work requires him/ her to find solutions to deal with the problems. The person will possess a knack for looking for solutions for the problems. Therefore, quantitative aptitude is tested in various competitive exams.

The full session was handled by Mr.R.Senthil Kumar from SSM Institute of Engineering and Technology. The session started with reasoning and logical problems

and he explained various shortcuts to solve logical reasoning problems in easiest way. That session windup around 12.05 pm.
