Webinar Report

How to prepare for an interview –After COVID-19 Pandemic”

By Mr. Antony Vance, Intel Corporation.

Date: **10.07.2020**

Session Timings : 3.00-4.30 P.M

The session was handled by Mr. Antony Vance, Intel Corporation, Bangalore. He mentioned that Before COVID-19, the largest disruptions to work involved new technologies and growing trade links. COVID-19 has, for the first time, elevated the importance of the physical dimension of work and the abrupt closure of many offices and workplaces this past spring ushered in a new era of remote work for millions of employed Americans and may portend a significant shift in the way a large segment of the workforce operates in the future. Most workers who say their job responsibilities can mainly be done from home say that, before the pandemic, they rarely or never teleworked. Only one-in-five say they worked from home all or most of the time. Now, 71% of those workers are doing their job from home all or most of the time. And more than half say, given a choice, they would want to keep working from home even after the pandemic, according to a new Pew Research Center survey. He encouraged students and motivated that stage the return to work, understand and leverage the advancements they enacted during the crisis, and chart new path forward and new possibilities are available.
