**Webinar on**

**“Career Opportunities in Cloud Administration”**

By Mrs. VijayaRayar, Cloud Admin, KGP Tech, Chennai

Date: 14-05-2020

Session Timings : 2.00-3.00 P.M

The session was handled by Mr. Vijaya Rayar, Cloud Admin, KGP Tech, and Chennai. He pointed out the Huge amount of Job opportunities available in the area of Cloud Admin. Data is your most vital asset and must be optimally stored and managed throughout its lifecycle. As cloud technology evolves, its needs are becoming more sophisticated, demanding countless actions and processes to work harmoniously in different environments. Cloud Volumes Platform is an integrative set of innovative storage infrastructures and intelligent data services, deployed and managed on your choice of cloud, public or private, through an advanced API-driven control plane with comprehensive oversight. He strongly mentioned that no special technical coding knowledge is needed for this domain. Amazon Elastic Container Service (Amazon ECS) is a scalable managed service that lets you run and orchestrate a large number of containers. It is not based on Kubernetes. he primary job responsibilities of the cloud administrator are to work in coordination with the IT department to develop and support cloud, windows or Unix infrastructure. They usually provide technical assistance on windows, cloud-based systems, and resolve operational problems. The professional will also assist in the administration of cloud service and a Windows server environment

Benefits of this webinars are, students have understood the importance of web development and its related courses. They are also interested to learn this area Students are provided E-Certificate, Website link for reference, Contact information about Resource person for future clarifications
