REPORT

Webinar on HUMAN BRAIN INTERFACE

Dr.T.Jayasankar

Date:22.5.2020 Session Timings :11.00-12.00PM

Human Brain Interface

An online webinar on “Human Brain Interface” has been conducted for II ,III Year ECE students and was presented by a resource person Dr.T.Jayasankar Assistant Professor,Department of ECE, Anna University,Tiruchirappalli.on 22 May 2020 | 11.00 am – 12.00 pm.

Brain-Human interfaces are systems that use signals recorded from the brain to enable communication and control applications for individuals who have impaired function. This technology has developed to the point that it is now being used by individuals who can actually benefit from it.

Brain-computer interfaces (BCIs) allow their users to communicate or control external devices using brain signals rather than the brain's normal output pathways of peripheral nerves and muscles.

The main applications of the Brain-Human Interface (HBI) have been in the domain of rehabilitation, control of prosthetics, and in neuro-feedback.

The lecturer explained lot of applications,This one hour online course was very useful for the students and informative.
