

Alumni Talk Series – CSE

Thursday, 12 May • 11:30 AM – 12:30 PM

Google Meet joining info

Video call link: <https://meet.google.com/yxw-tozx-xwp>

Resource person

Mr. K. R. D. GOPI

DEVELOPER

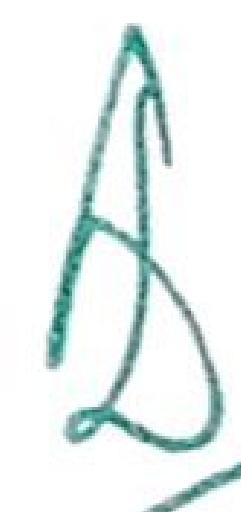

PIRAI INFOTECH

N.P. 13/5/22
Department Alumni Incharge

Ms.N.Padmapriya
Assistant Professor
CSE Department
SSMIET

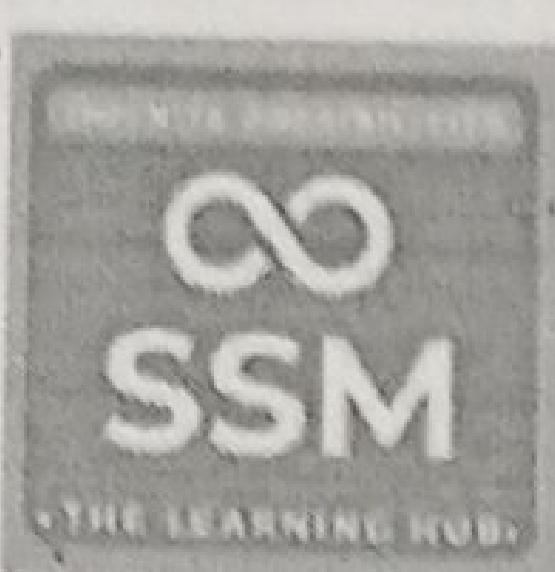

V.Jm
HoD/CSE

Dr.V.Shunmughavel

Principal

Dr.D.Senthil Kumaran

SSM INSTITUTE OF ENGINEERING AND TECHNOLOGY

www.ssmiet.ac.in

(Approved by AICTE, New Delhi • Affiliated to Anna University, Chennai • Accredited by NAAC)

SSMIET Alumni Association *Alumni Talk Series*

From MAY 9th ONWARDS

10.05.2022
Civil

Mr. J.Mathivanan
Professional Assistant,
Anna University, Chennai
<https://meet.google.com/hsm-imyf-lew>

09.05.2022
Automobile

Mr. S.Lingeswaran
Ass.Manager,
Heromotocorp Ltd,
Chennai
<https://meet.google.com/ftz-lbdx-sm>

11.05.2022
ECE

Ms. U.Glory Nancy
HR, AVTEC – CK Birla Group,
Chennai

<https://meet.google.com/mmd-dusw-enu>

12.05.2022
CSE

Mr. K.R.D.Gopi
Developer,
PirailInfotech Pvt Ltd,
Pollachi.
<https://meet.google.com/ynw-tozx-xvp>

14.05.2022
EEE

Ms. S.Rishiya Dora
Assistant system Engineer,
Tata consultancy services limited,
Chennai
<https://meet.google.com/bvk-ouxi-rps>

13.05.2022
Mechanical

Mr. S.Gowthamraj
SAP Material Management Specialist,
EASI Actalent, Maryland, USA
<https://meet.google.com/rfs-kprf-pcg>

Alumni Coordinators :

Dr. G.Selvabharathi
AsP/Civil

Mr. D.Manoj
AP/EEE

Dr. D.Senthil Kumaran
Principal

All are cordially invited

REPORT ON ALUMNI MEETING

On May, 2022 we had an Alumni Talk series for III year CSE students with **K.R.D.GOPI, Software Developer, Pirai Info Tech, Pollachi** through google meet. We had an interactive session and student's doubts clarification on the current technologies and the life in IT Industry. He shared his experience to reach his present point which really was felt very useful for all students and felt a hope to move forward. Talking about the question answer session it was a complete note-worthy one.

NAME: MADHUMITHA.M

QN 1: Since I am a bio-maths student, I have a very less interest in coding but felt a little interest in web development and what would you prefer me?

ANS: The group that you choose in 12th doesn't matter, only interest matters. Since you are interested in web development but lacking in coding you might choose the designing sector, that involves designing a wire-frame of the web pages that is done with the tools like flutter, figma, etc., Try to start studying about these designing tools and you can also study Photoshop that is also in demand when learned properly. Never think about the disadvantages just go through your interests and everything goes right.

QN 2: Which one will you prefer: SERVICE BASED OR PRODUCT BASED and what's the difference?

ANS:

The one who delivers the whole product to the client is called product based and though the ones work in hands to make the complete product is called a service based company. The one I work comes under service based and those the big leading CTS, TCS, Infosys all these come under service based. While the Amazon, Flipkart comes under product-based. I would recommend Start-Up more than all these classification where you could grow along with them as the company emerges.

STUDENT NAME: RUBAN M

QN 3: What is the difference between Developing and Testing teams?

ANS: The one who chooses developing is purely due to their interest in coding in any of the languages. As in case of testing it is platform that is mostly chosen by those who are NON-IT based ones who wanted to end up in IT Industry. Taking the testing section as their base in IT Industry they develop their knowledge and interest needed for their survival in the industry.

QN 4: Since different front-end frameworks keeps on emerging on daily basis, each and which we study becomes out dated in a due course of time. So what to do?

ANS: No language or framework that you learn becomes a waste. As an example today we have all these node js, express js on market today these all comes with the basics from JavaScript that stands as the basic for all the above mentioned. So learning a framework never becomes a waste. Learn the framework that you are interested in and keep on updating yourself on the updated versions. IT Industry is all about your growing interest and knowledge about the field.

QN 5: How to approach a design of the web page?

ANS: You try working on those basic settlements on the webpage that is called as the wire frame work of the design. By working on them you would get a clear cut idea about your UI/UX design of your webpage. Then start using the tools like figma to get ready with your complete design of your webpage though.

STUDENT NAME: PRITHISHIKA.S

QN 6: Is IT really that stressful as depicted by many?

ANS: Stress is something that comes when we do a work without liking, when you make it in the field of your interest you will never feel that sense of pressure. The simple rule is that choose the domain you are good at and keep yourself updated which makes your working lifestyle more interesting.

STUDENT NAME: PRASHANTH S

QN 7: How can we apply for internships?

ANS: It differs on the requirements of the company. On talking about internships we have paid as well as unpaid internships. We can apply for both where we have to pay some amount for the former while for the latter you have to contribute your knowledge for the undergoing project of the company. Some companies recruit on the basis of your resume and your skill sets while some recruit on basis of the performance to the task they keep as the entry to their company.

STUDENT NAME: AARTHICK RAJA A P

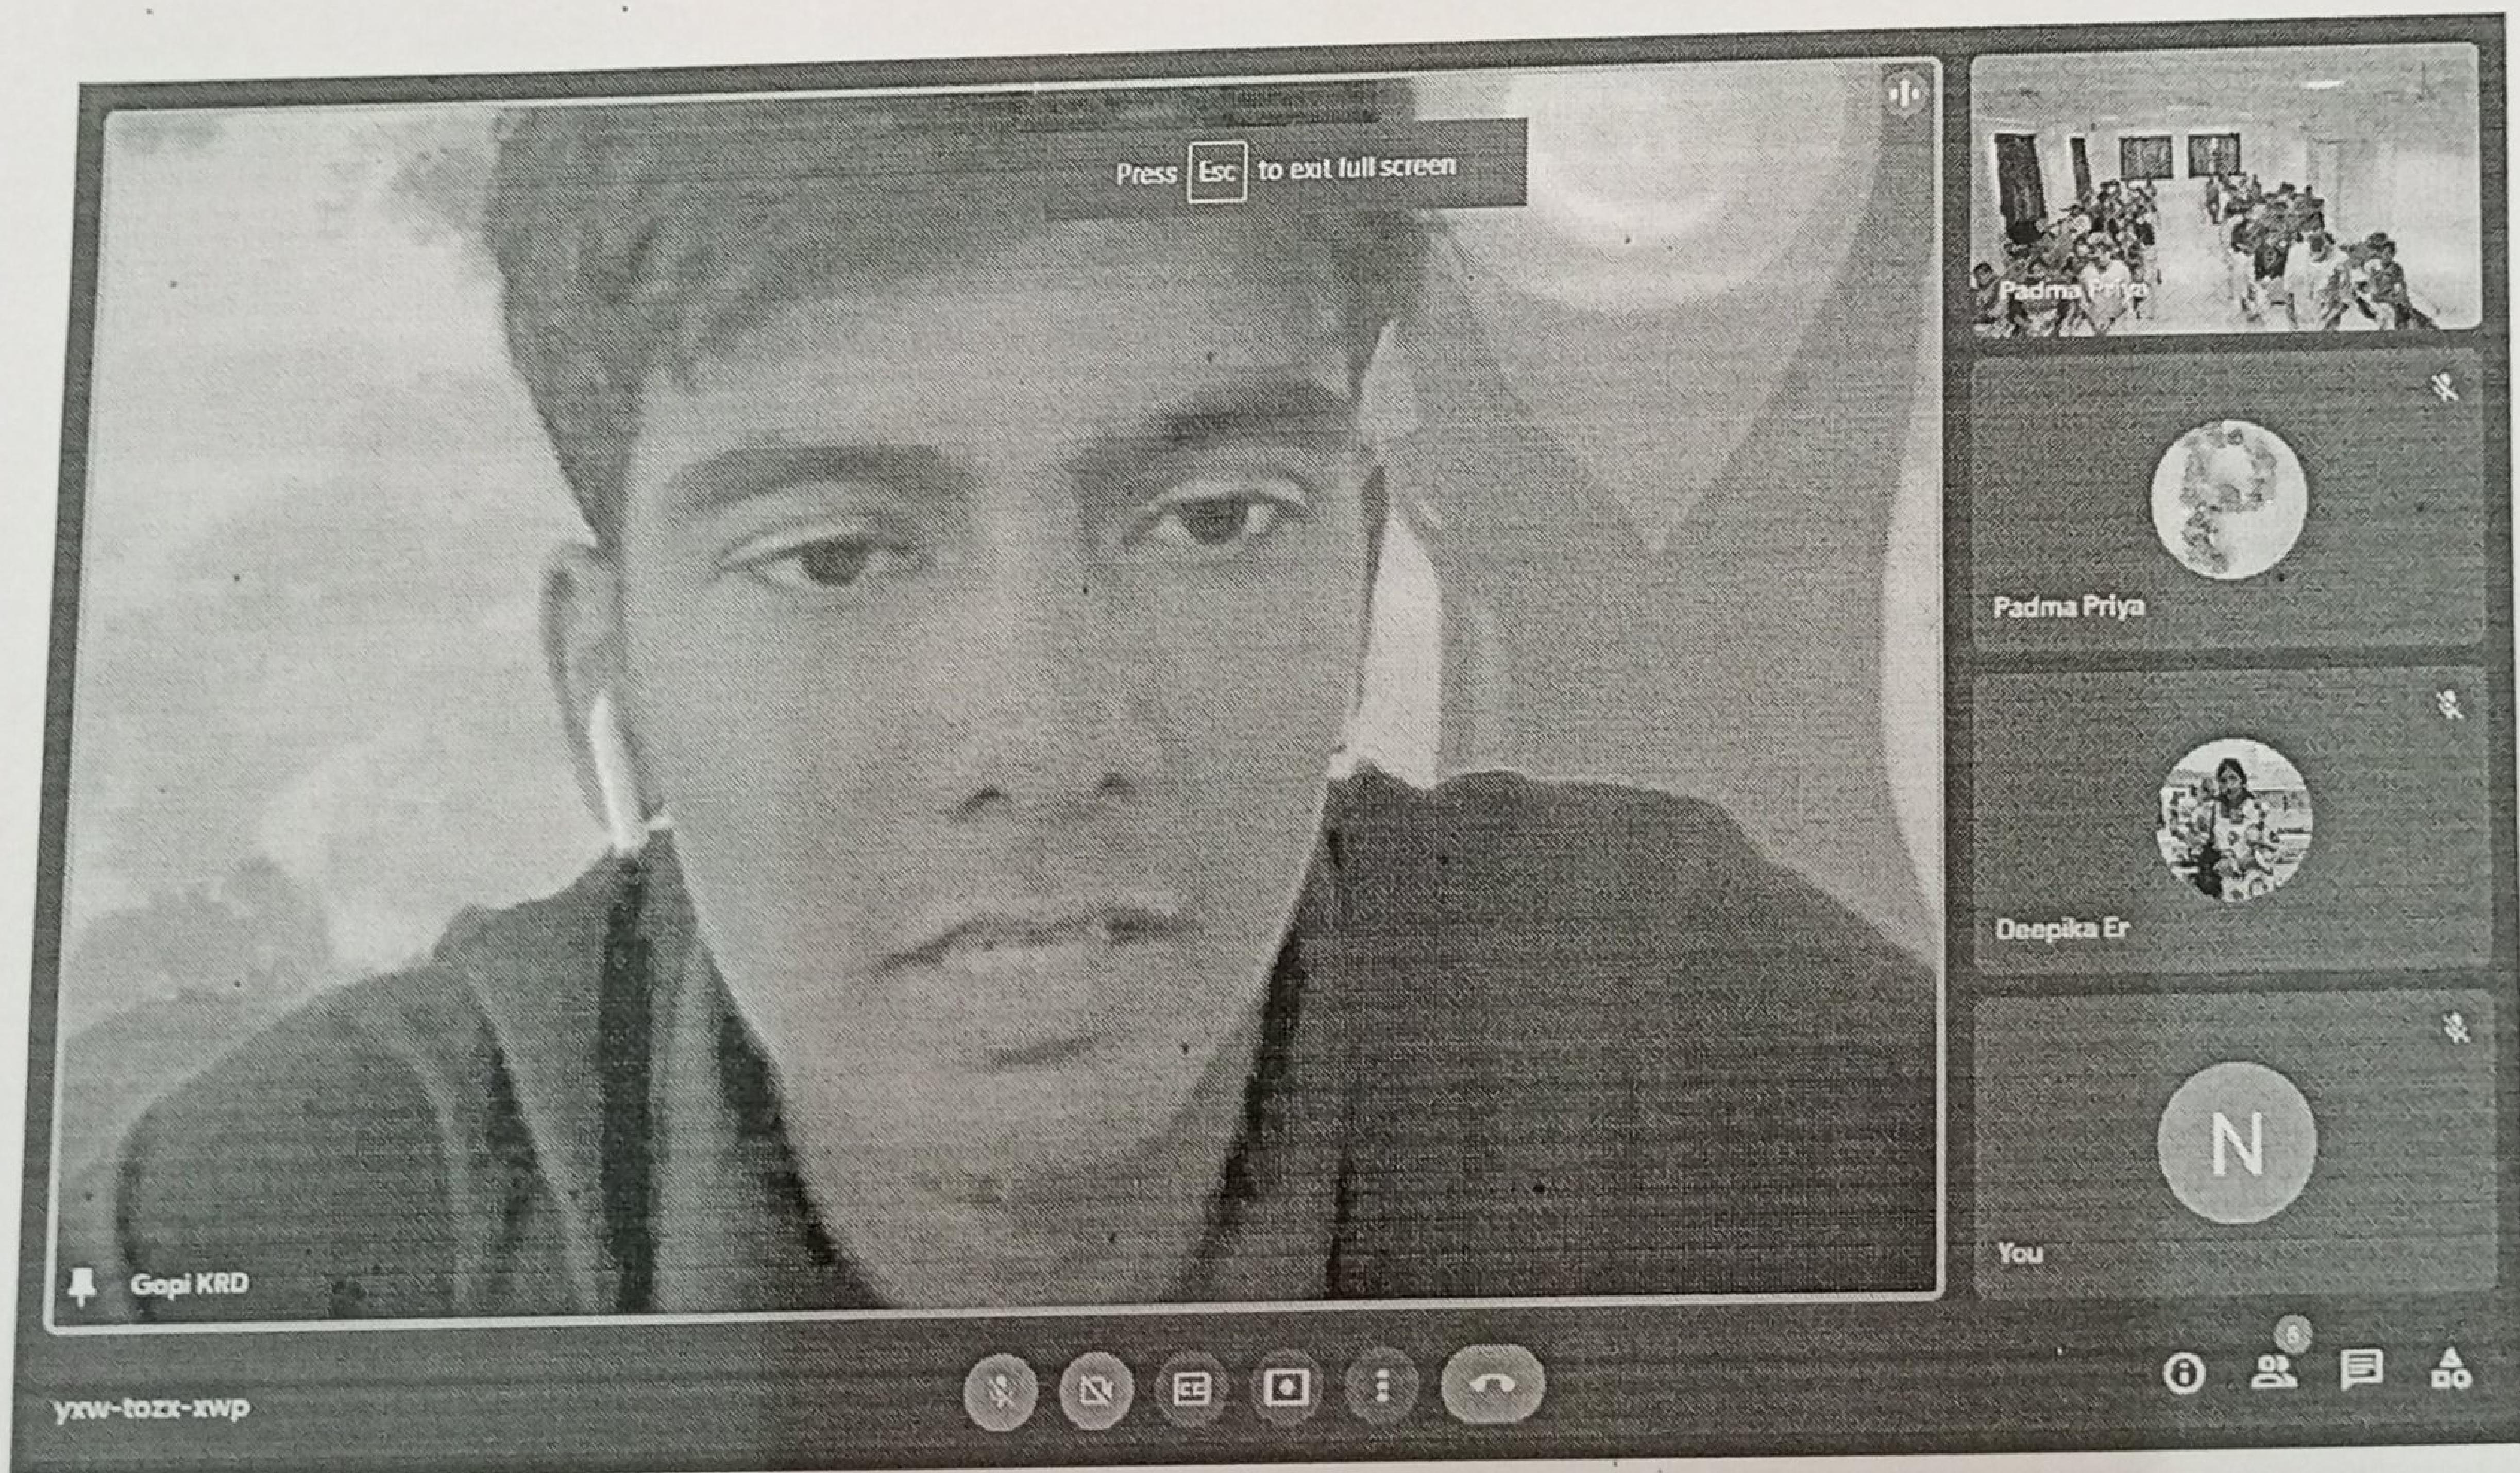

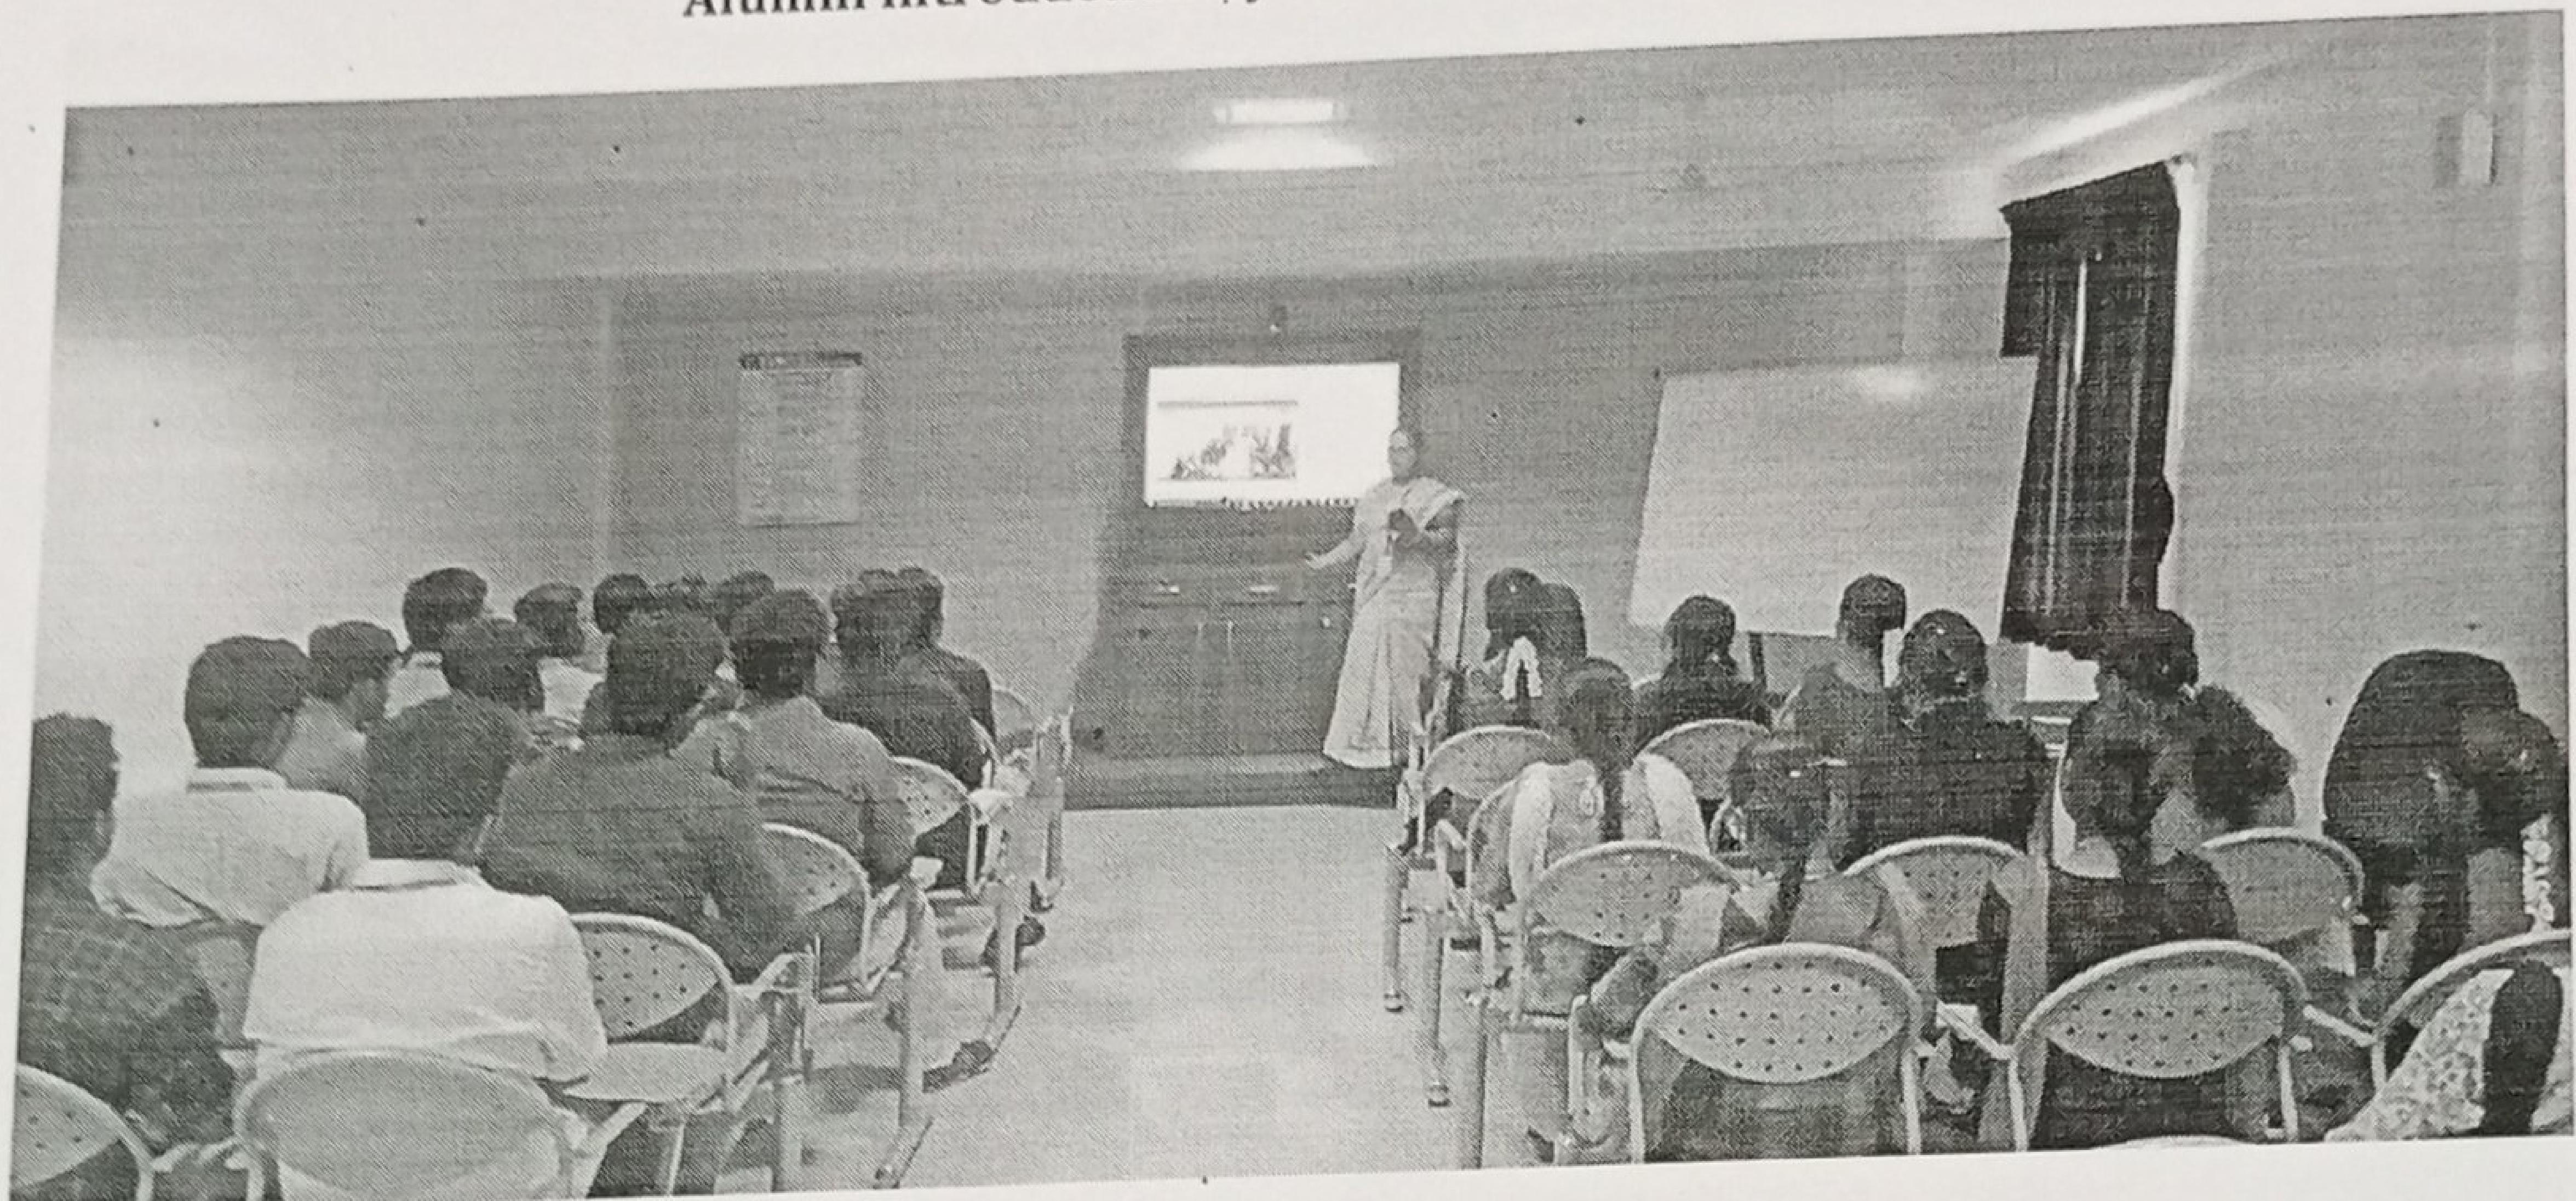

QN 8: What kind of platform will you prefer in the IT industry?

ANS: Talking on the basis of the amount paid developing platform stands first while all other departments are also good though. Mainly everything is based on the interest that we have towards the domain that we choose to work on. Choose the domain of your interest that becomes the basis of everything.

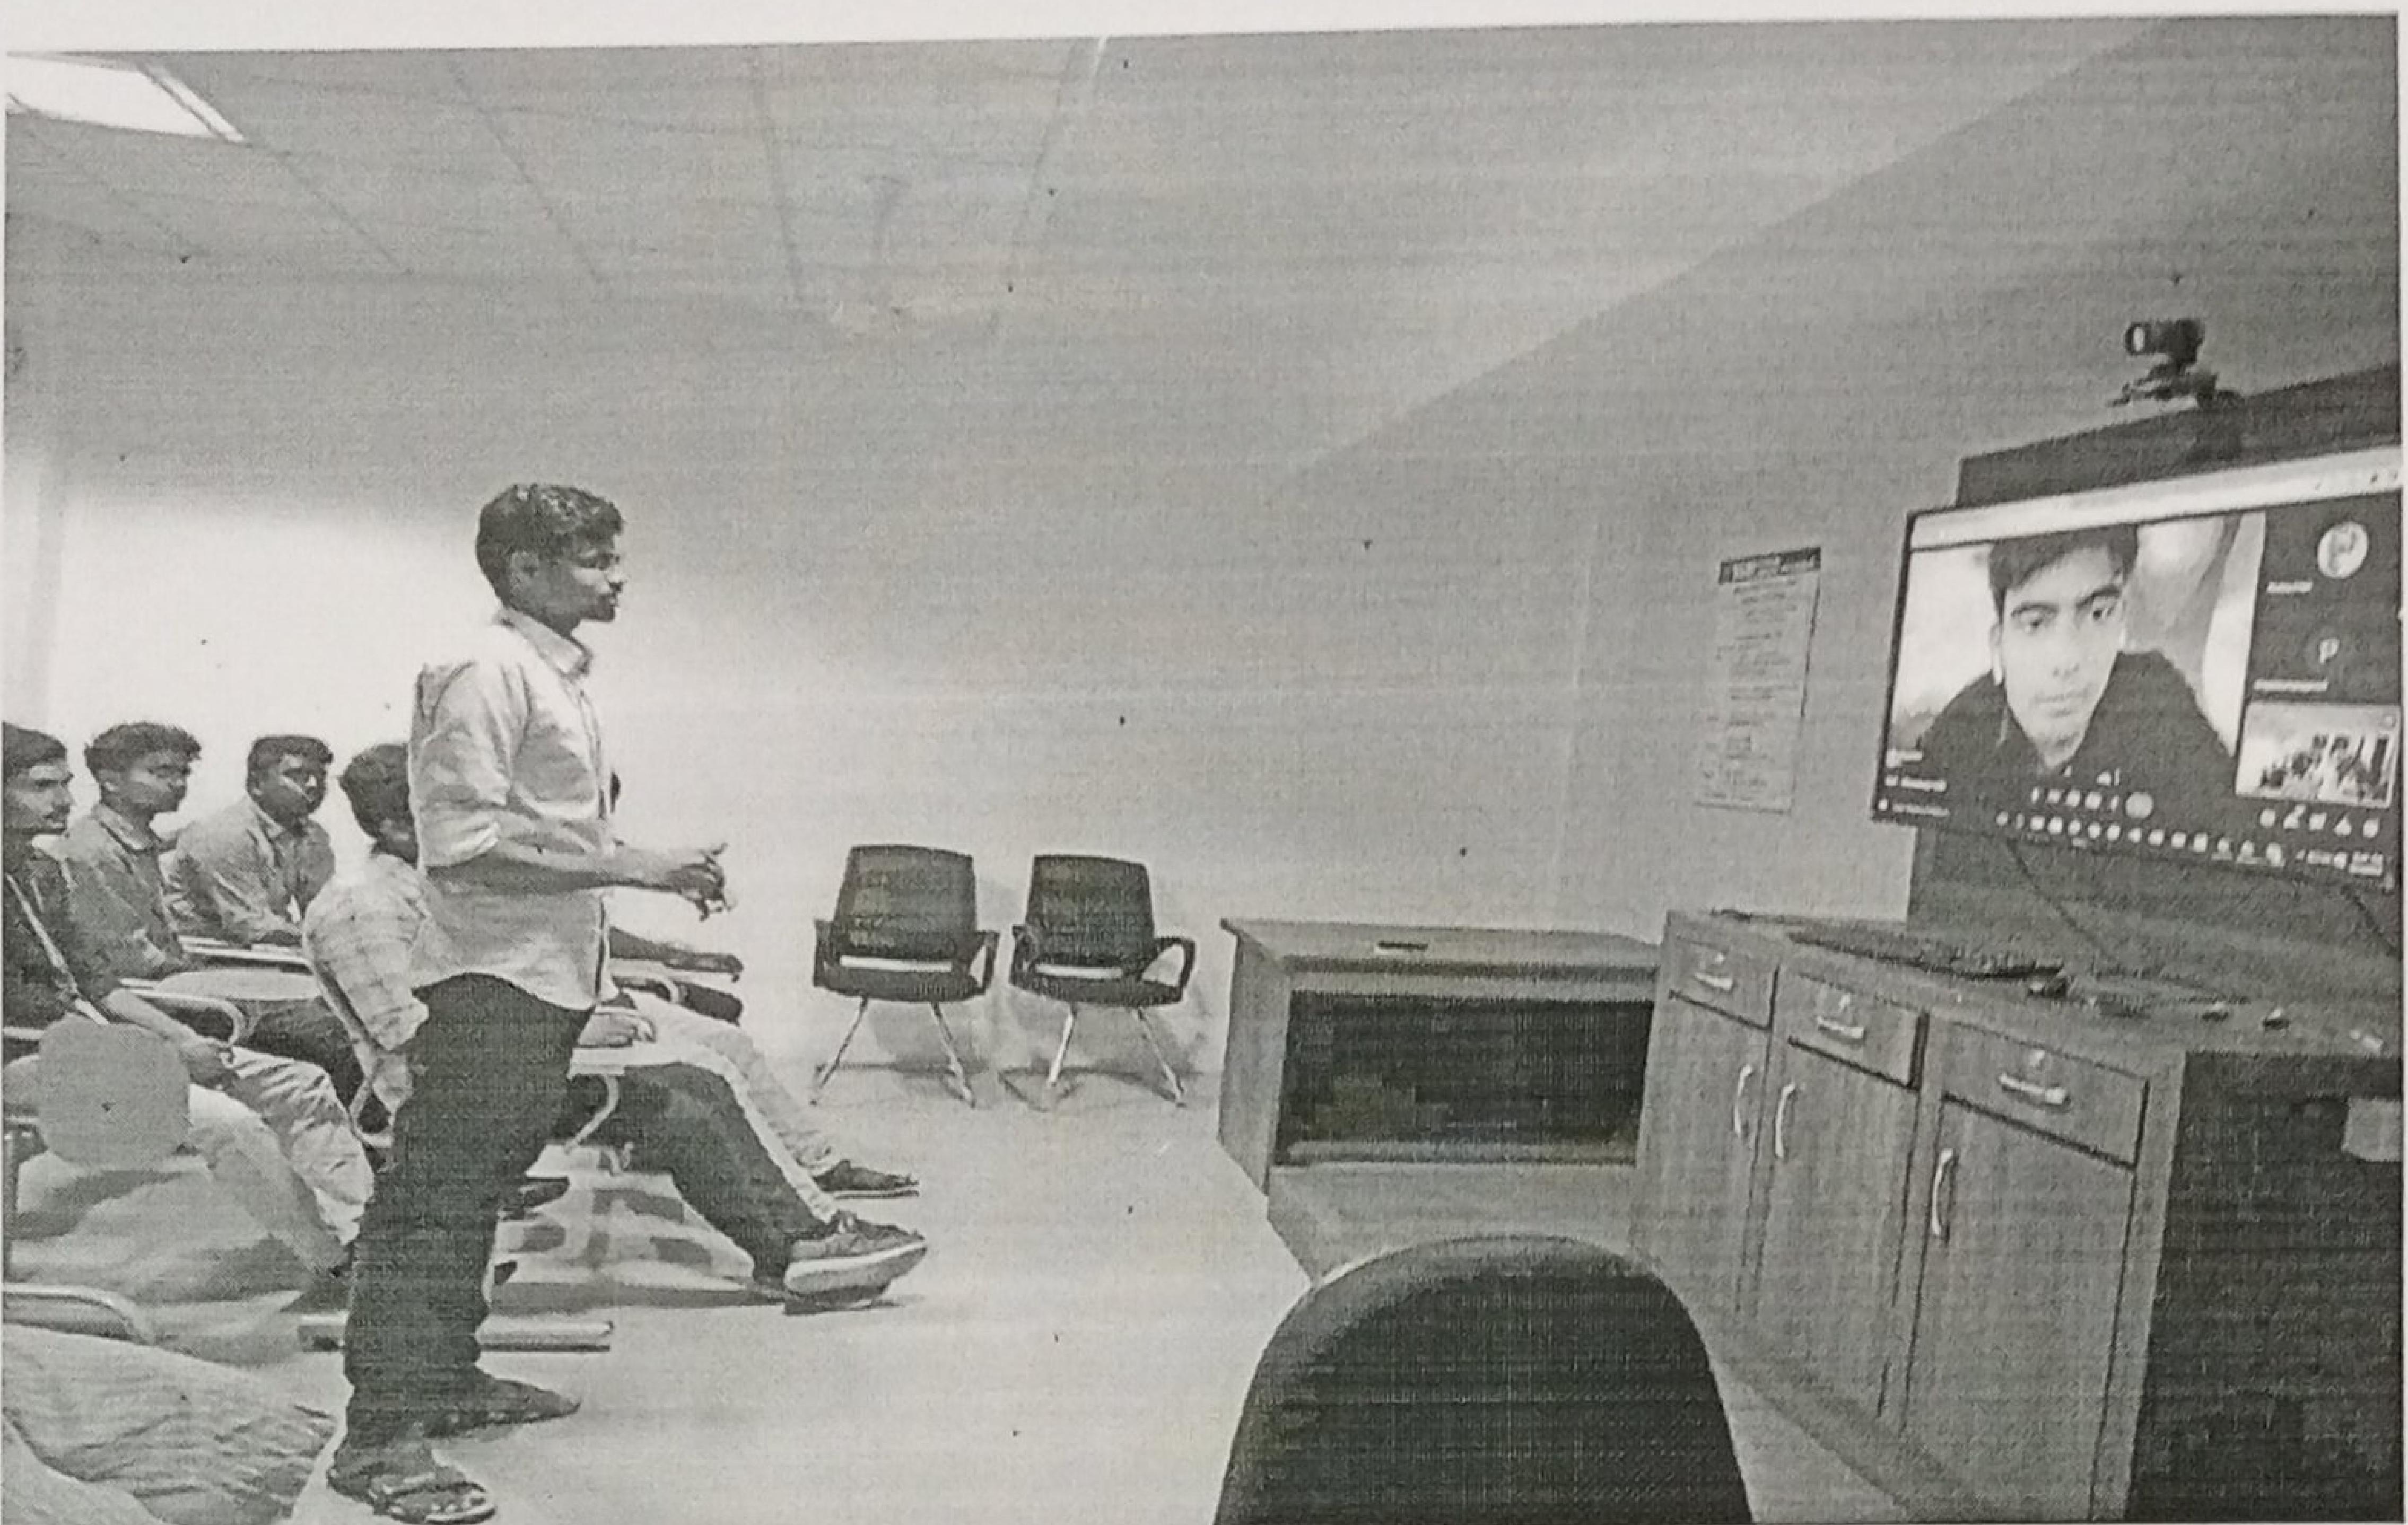

And the closing mend was with demo of the current project he is working on. He gave a detailed description about each and every sector the project and how it works.

On the whole the session was a complete eye opener about the working model of the IT industry which gave students a clear cut idea about choosing the domain and the type of work each platform involves.

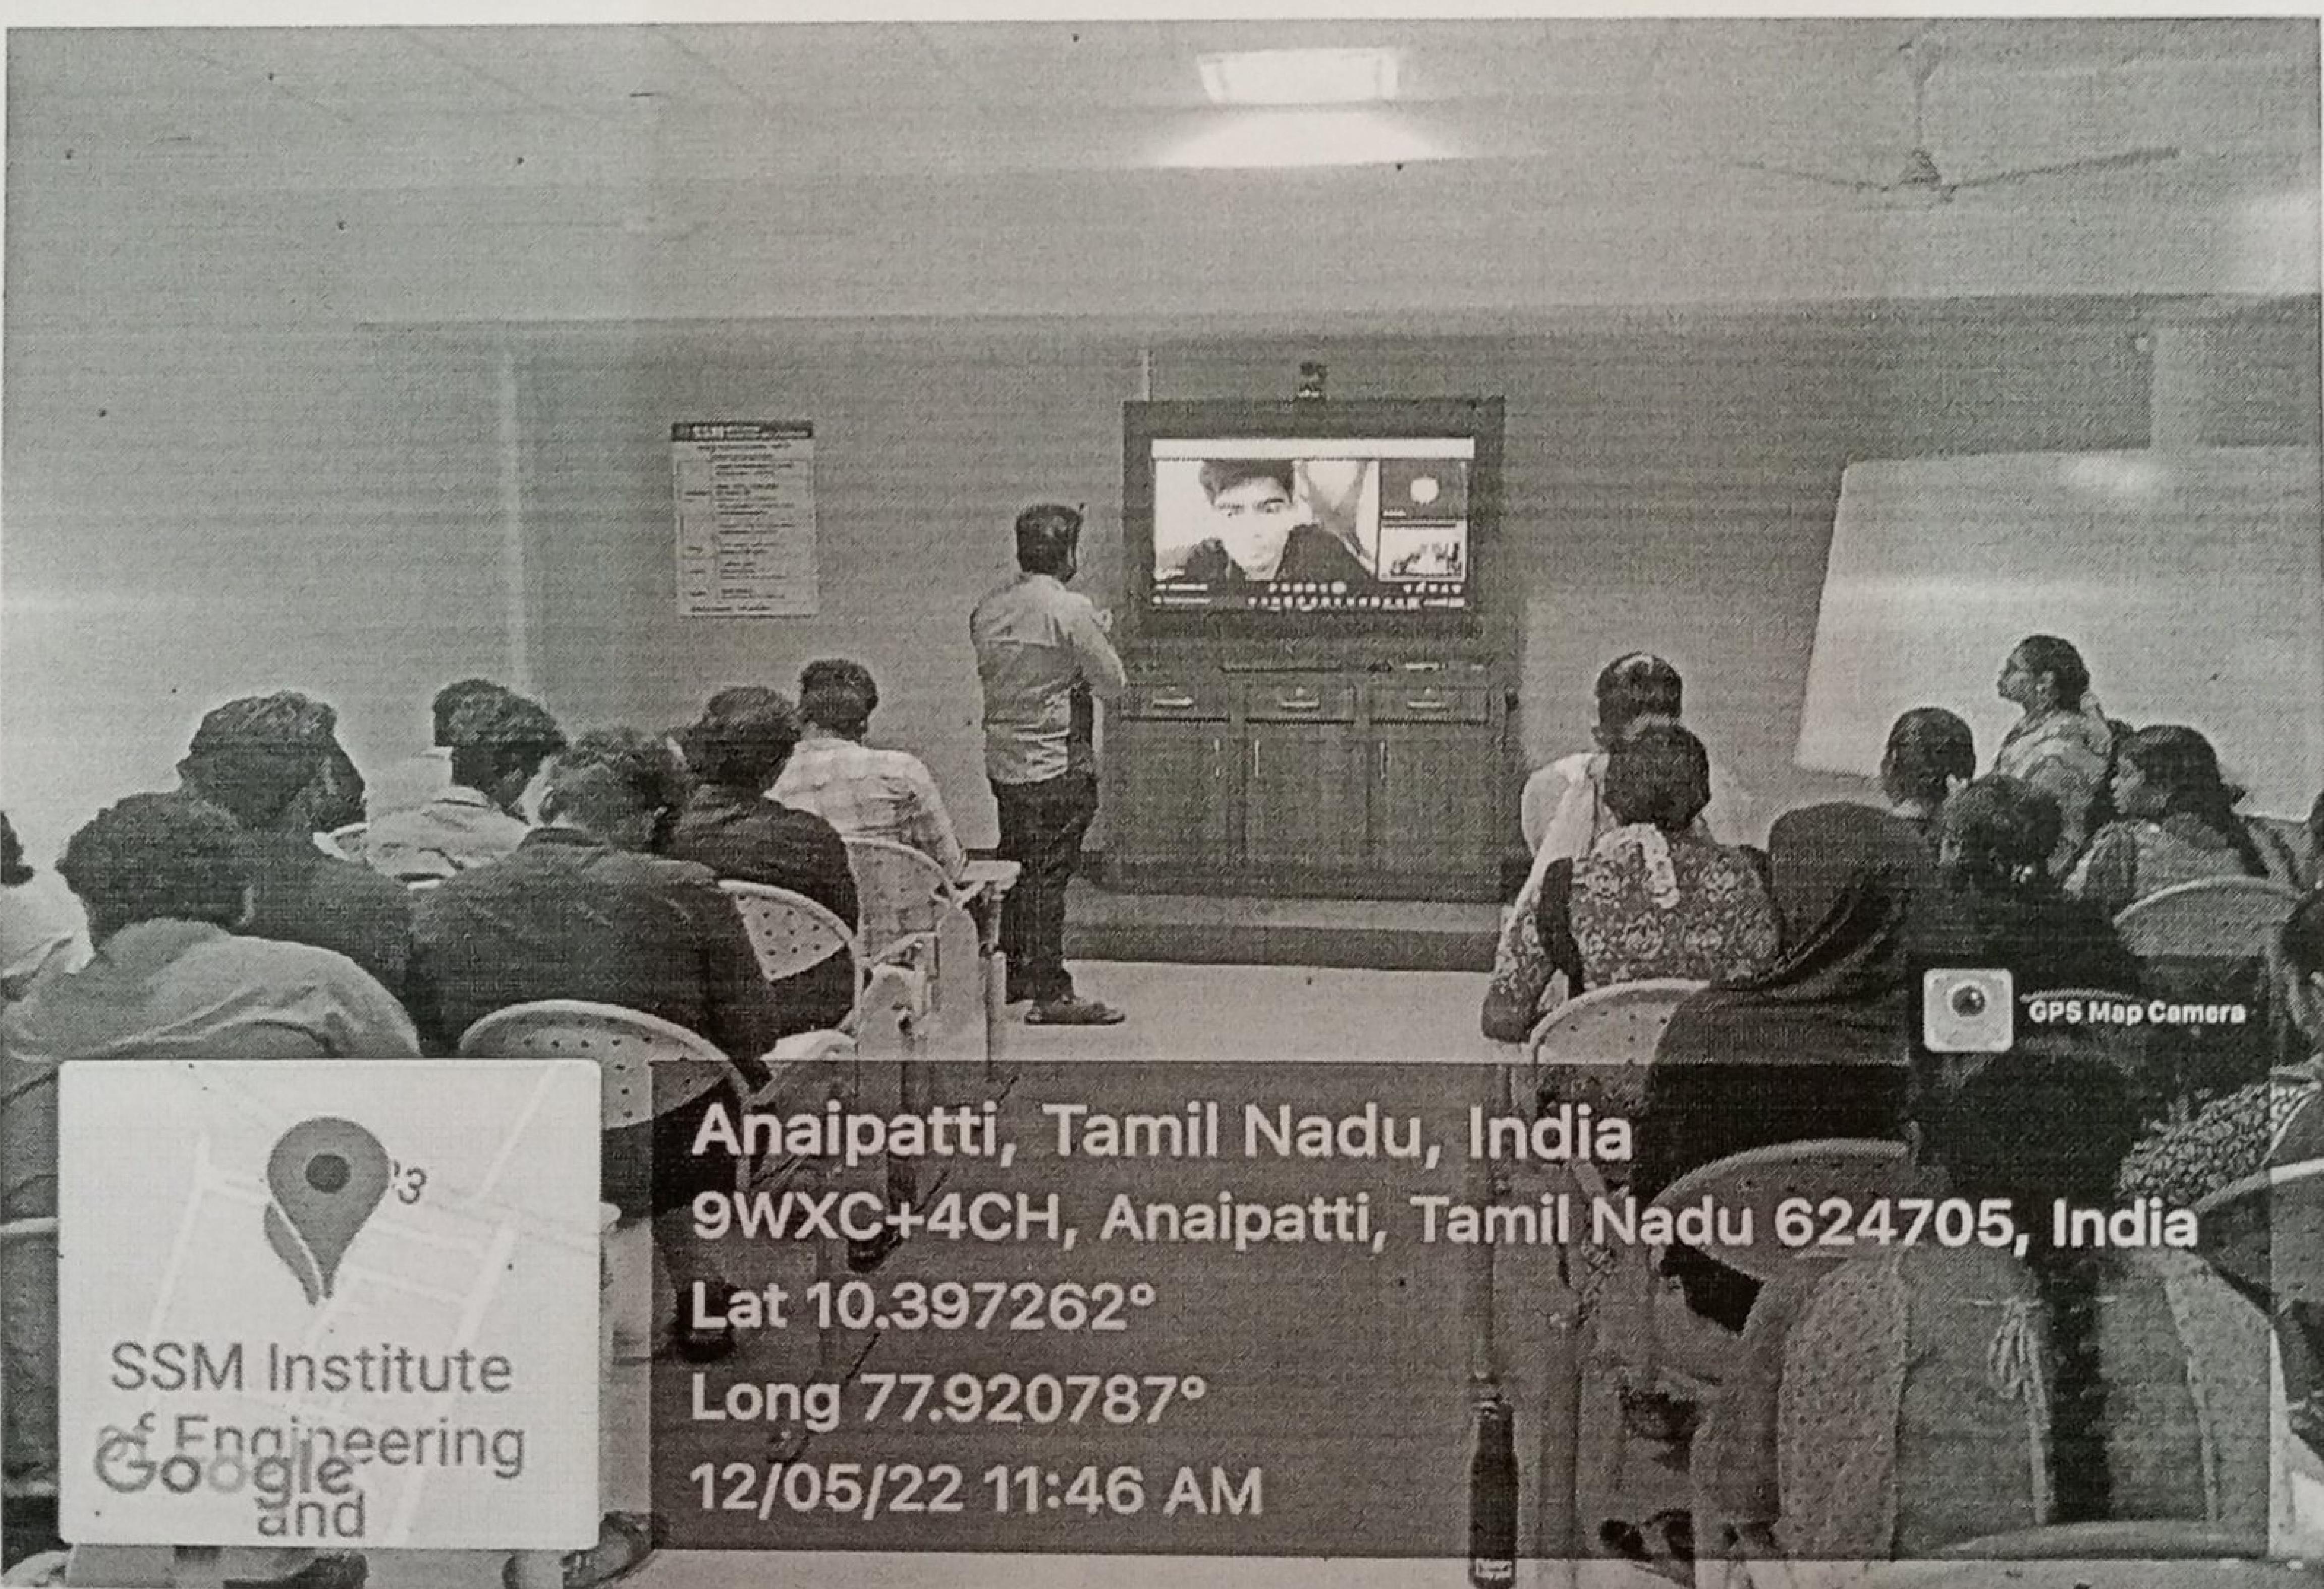

Alumni introduction by Ms.N.Padmapriya,AP/CSE

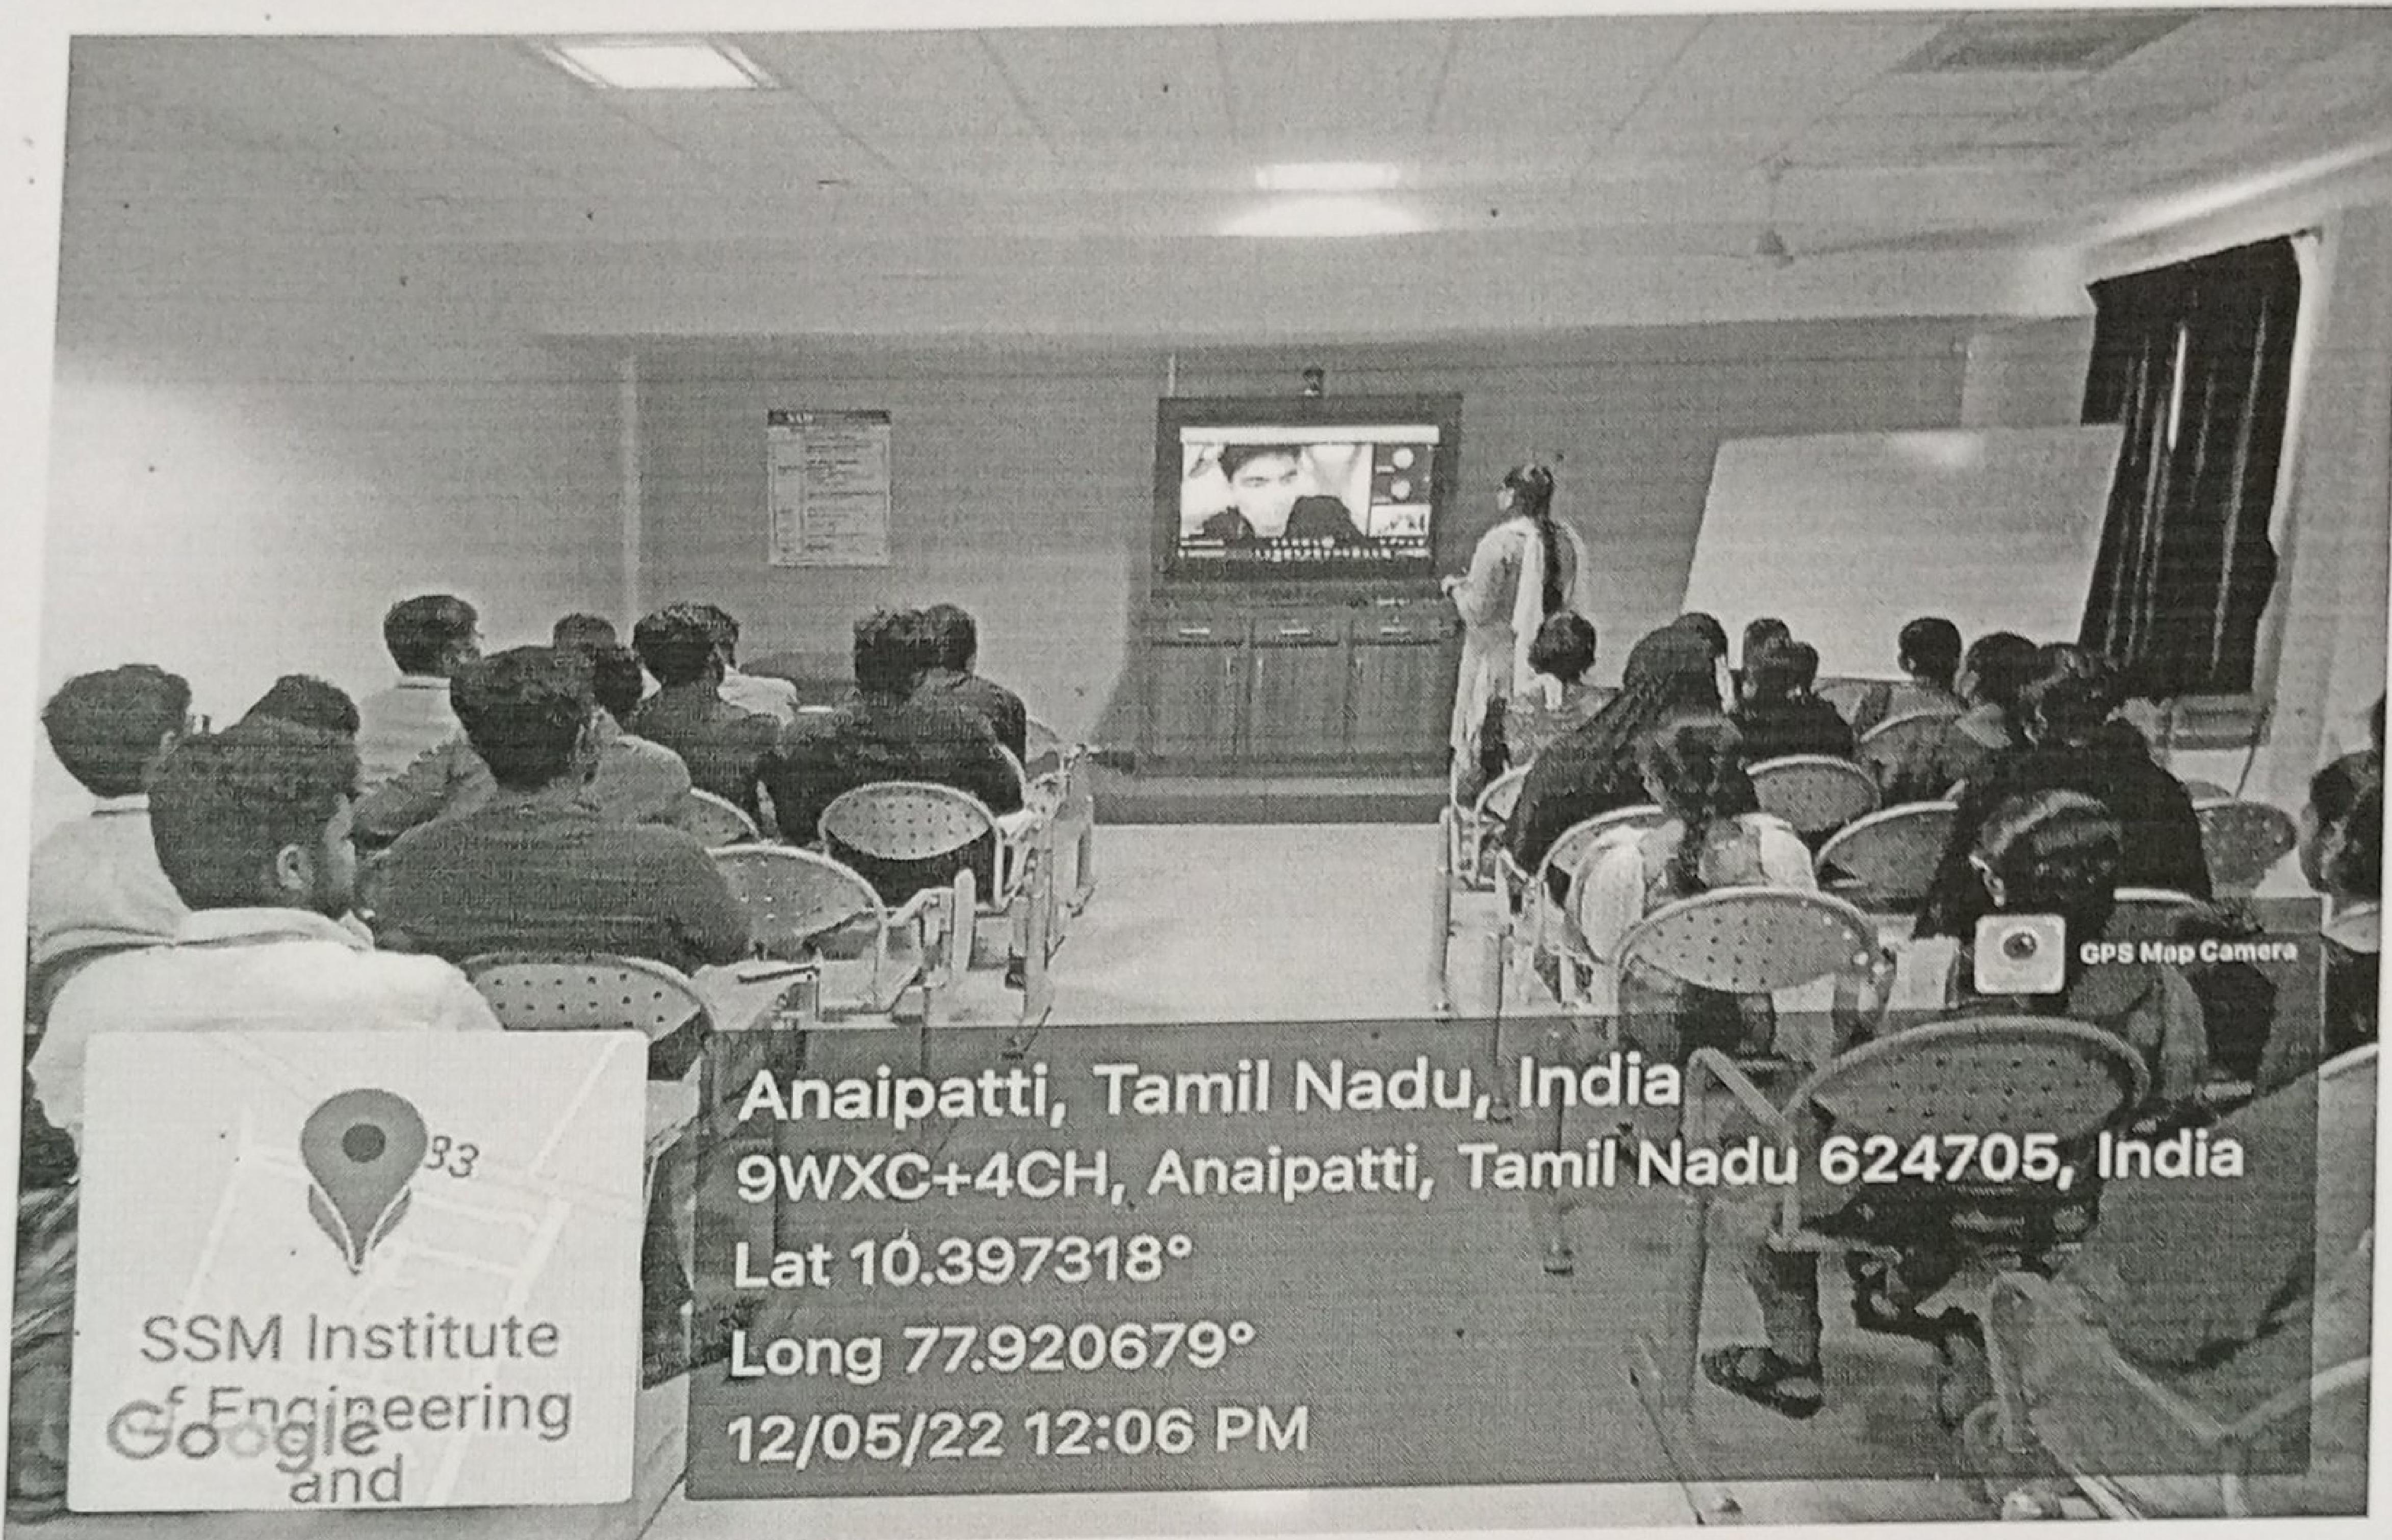

Students Doubts Clarification – M.Ruban, III CSE

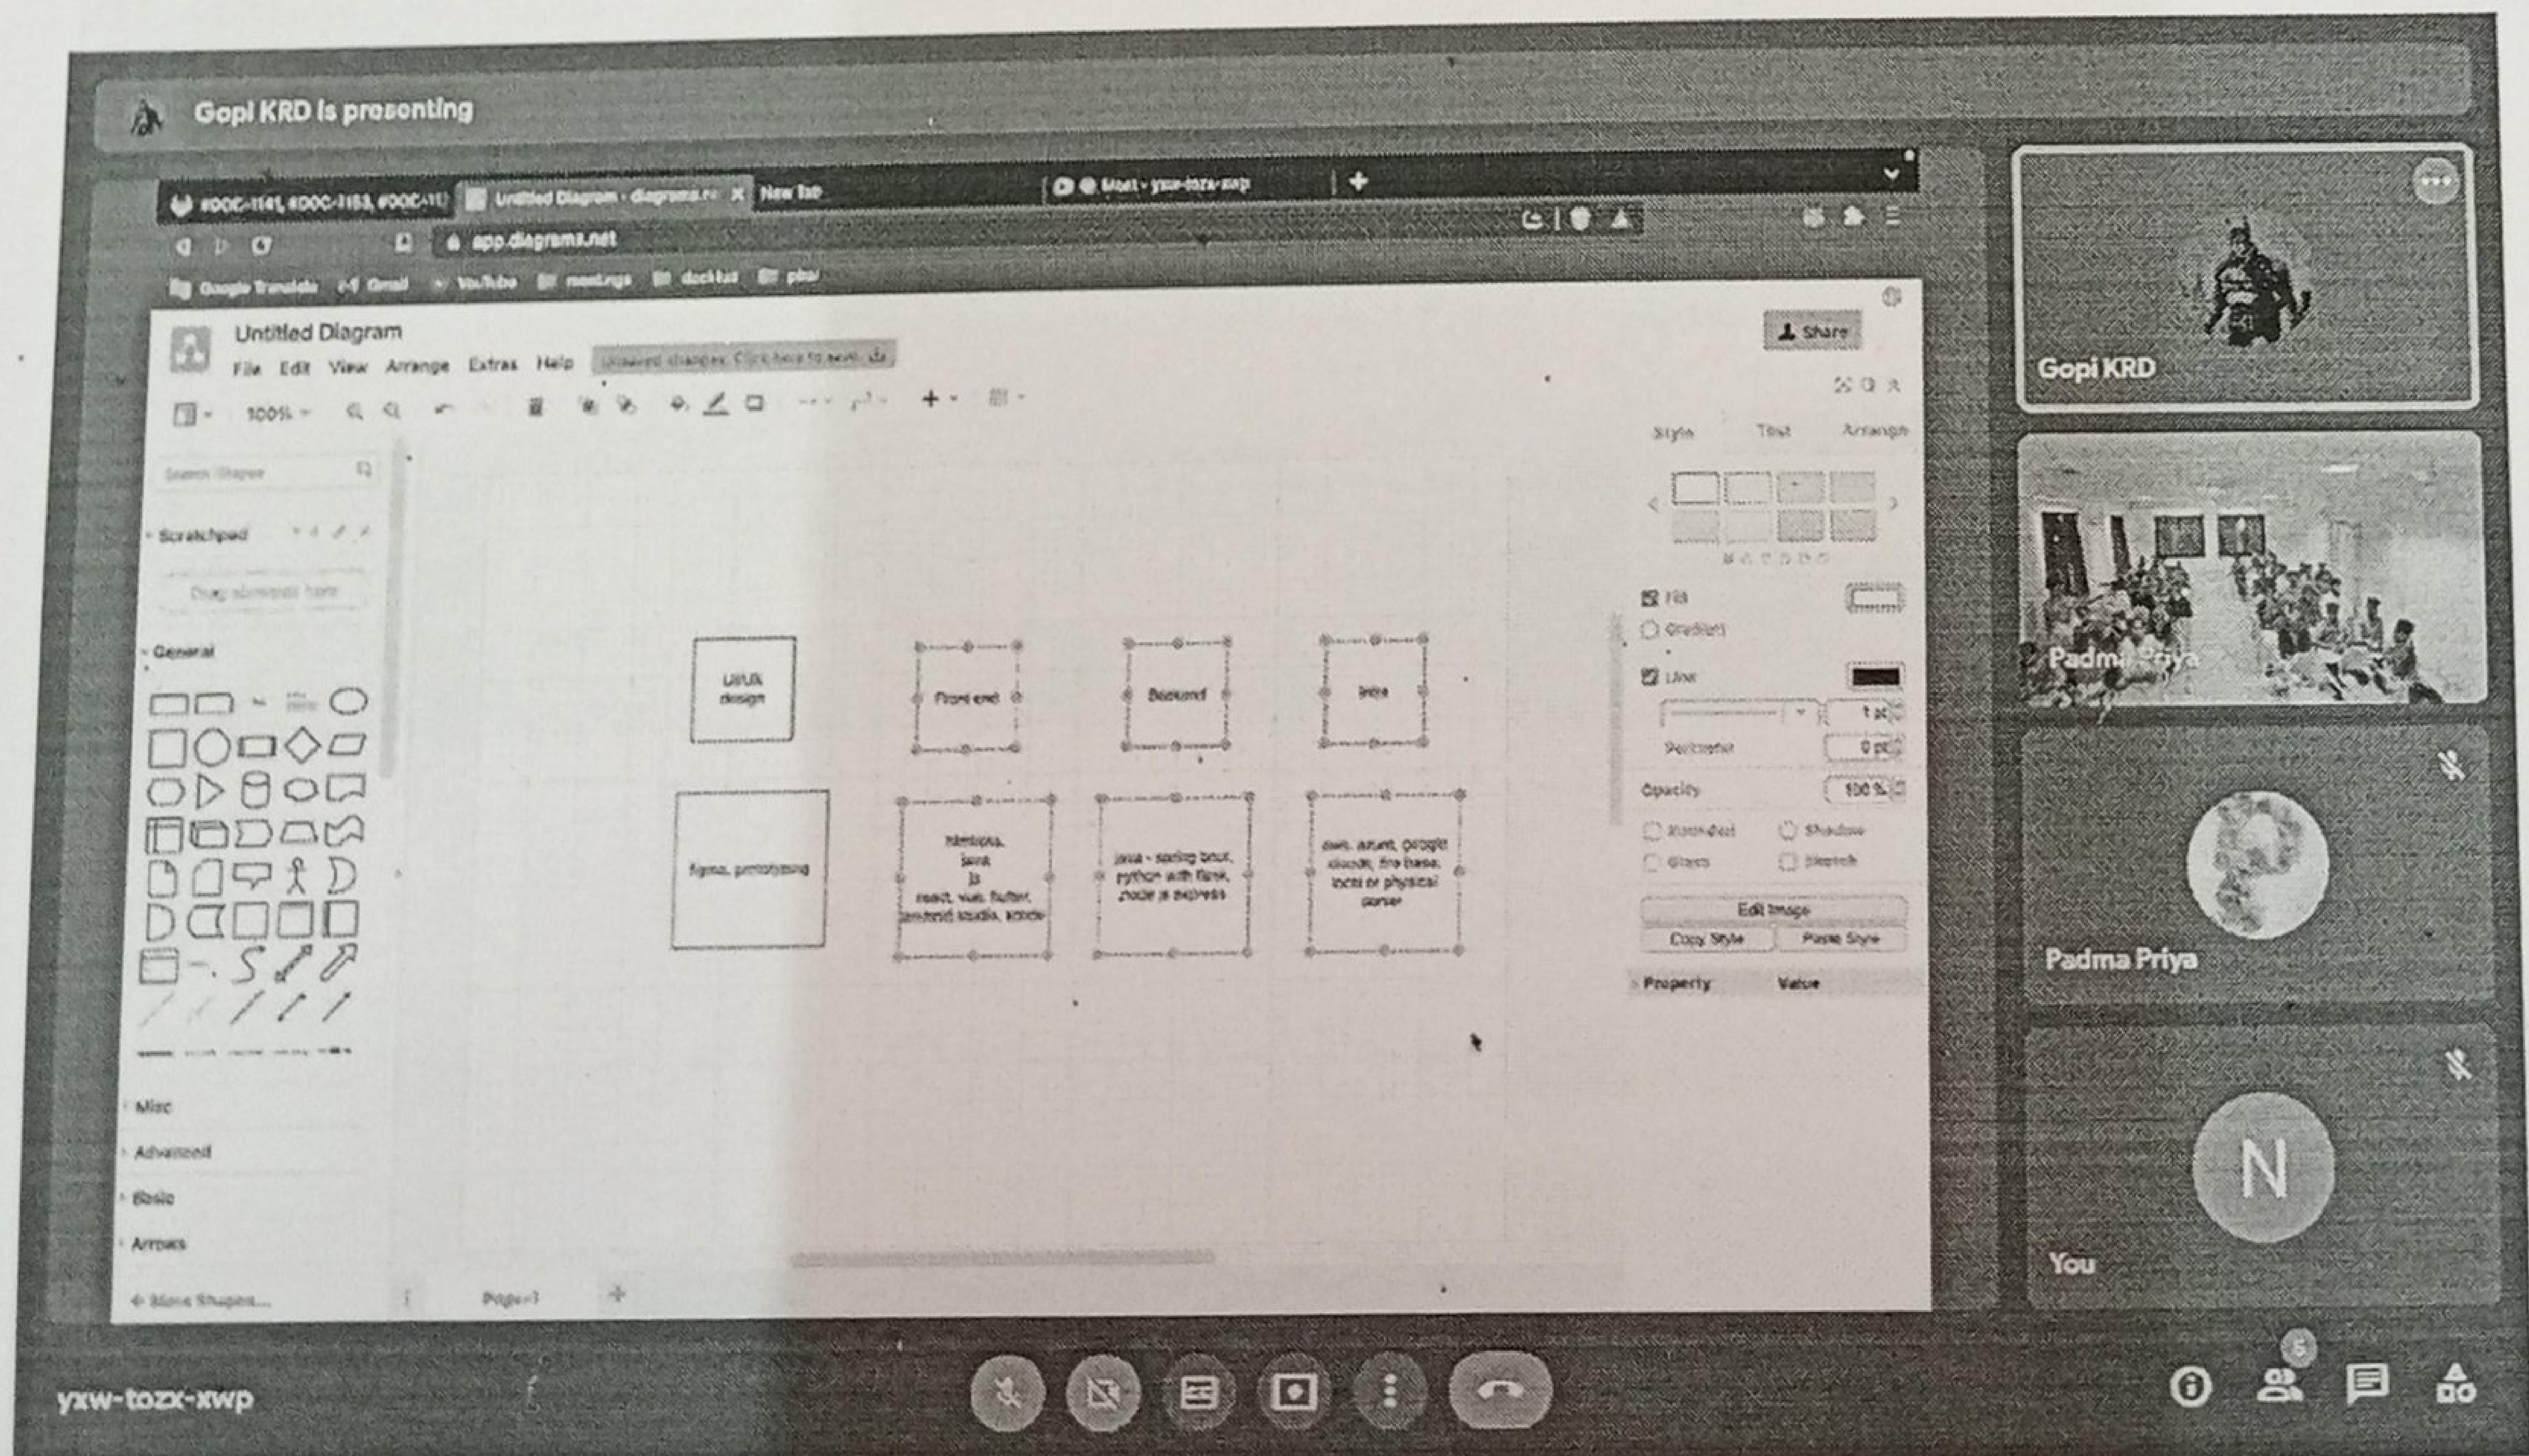

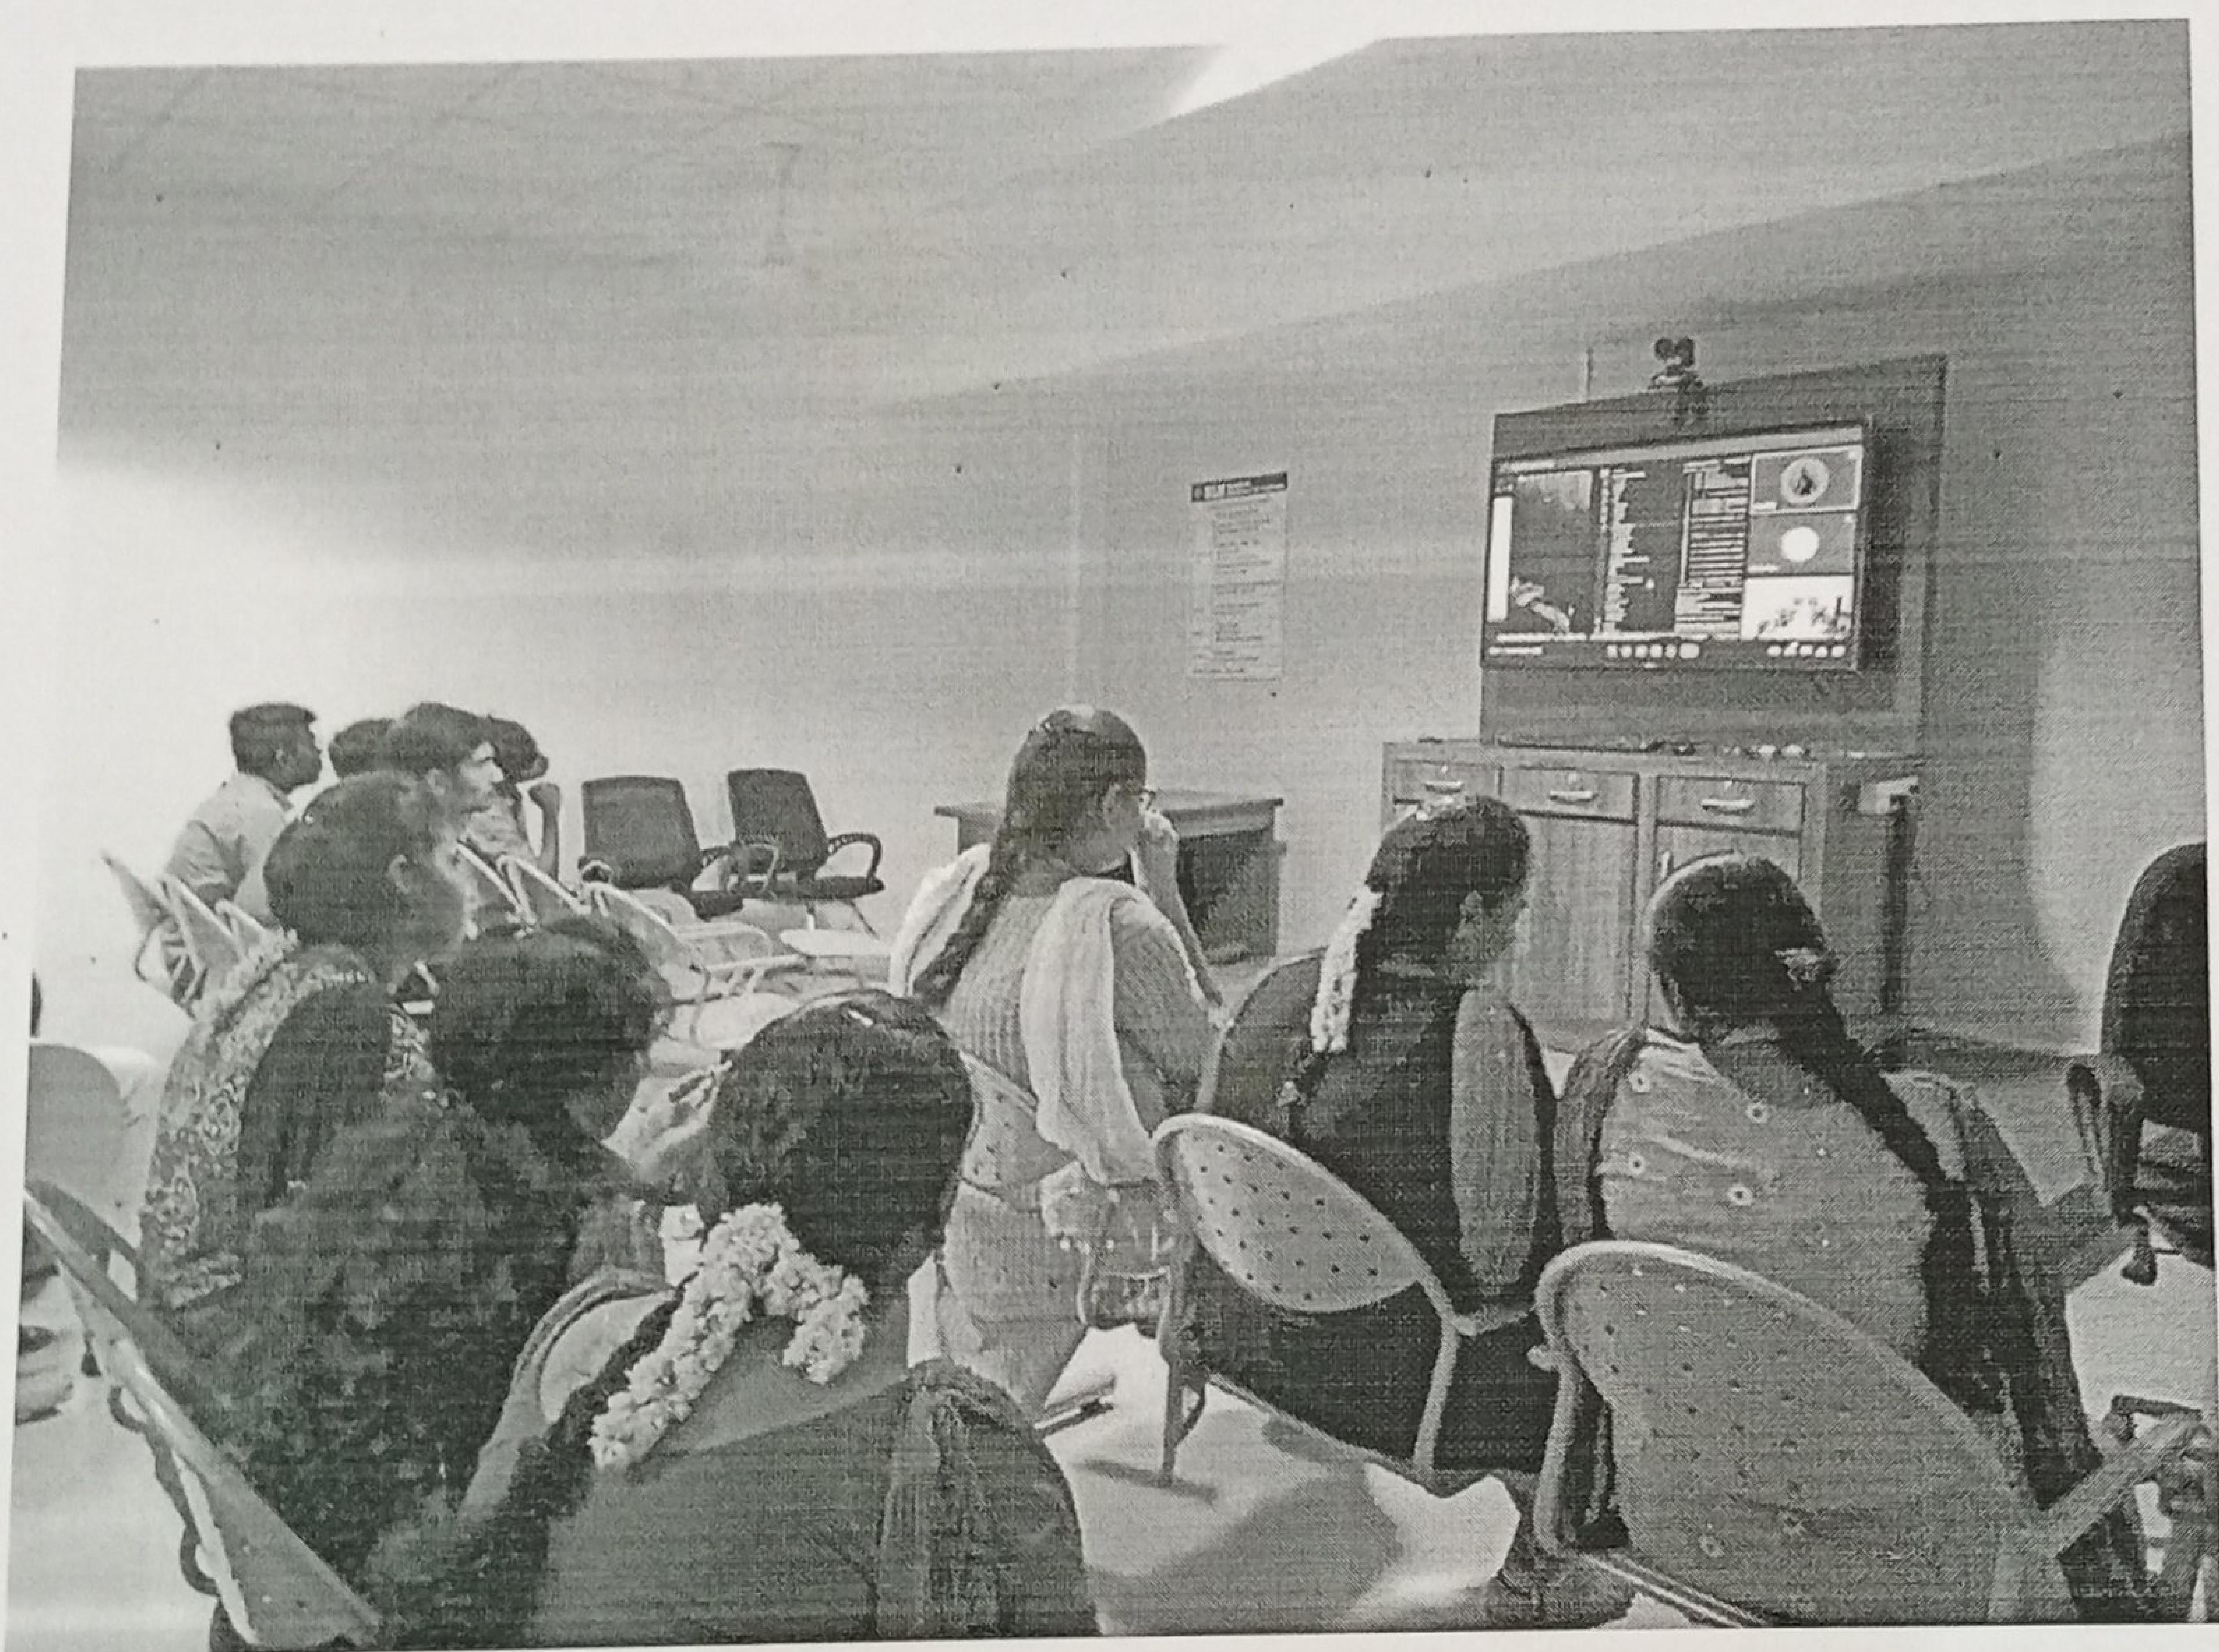

Students Doubts Clarification – A.P.Aarthick raja, III CSE

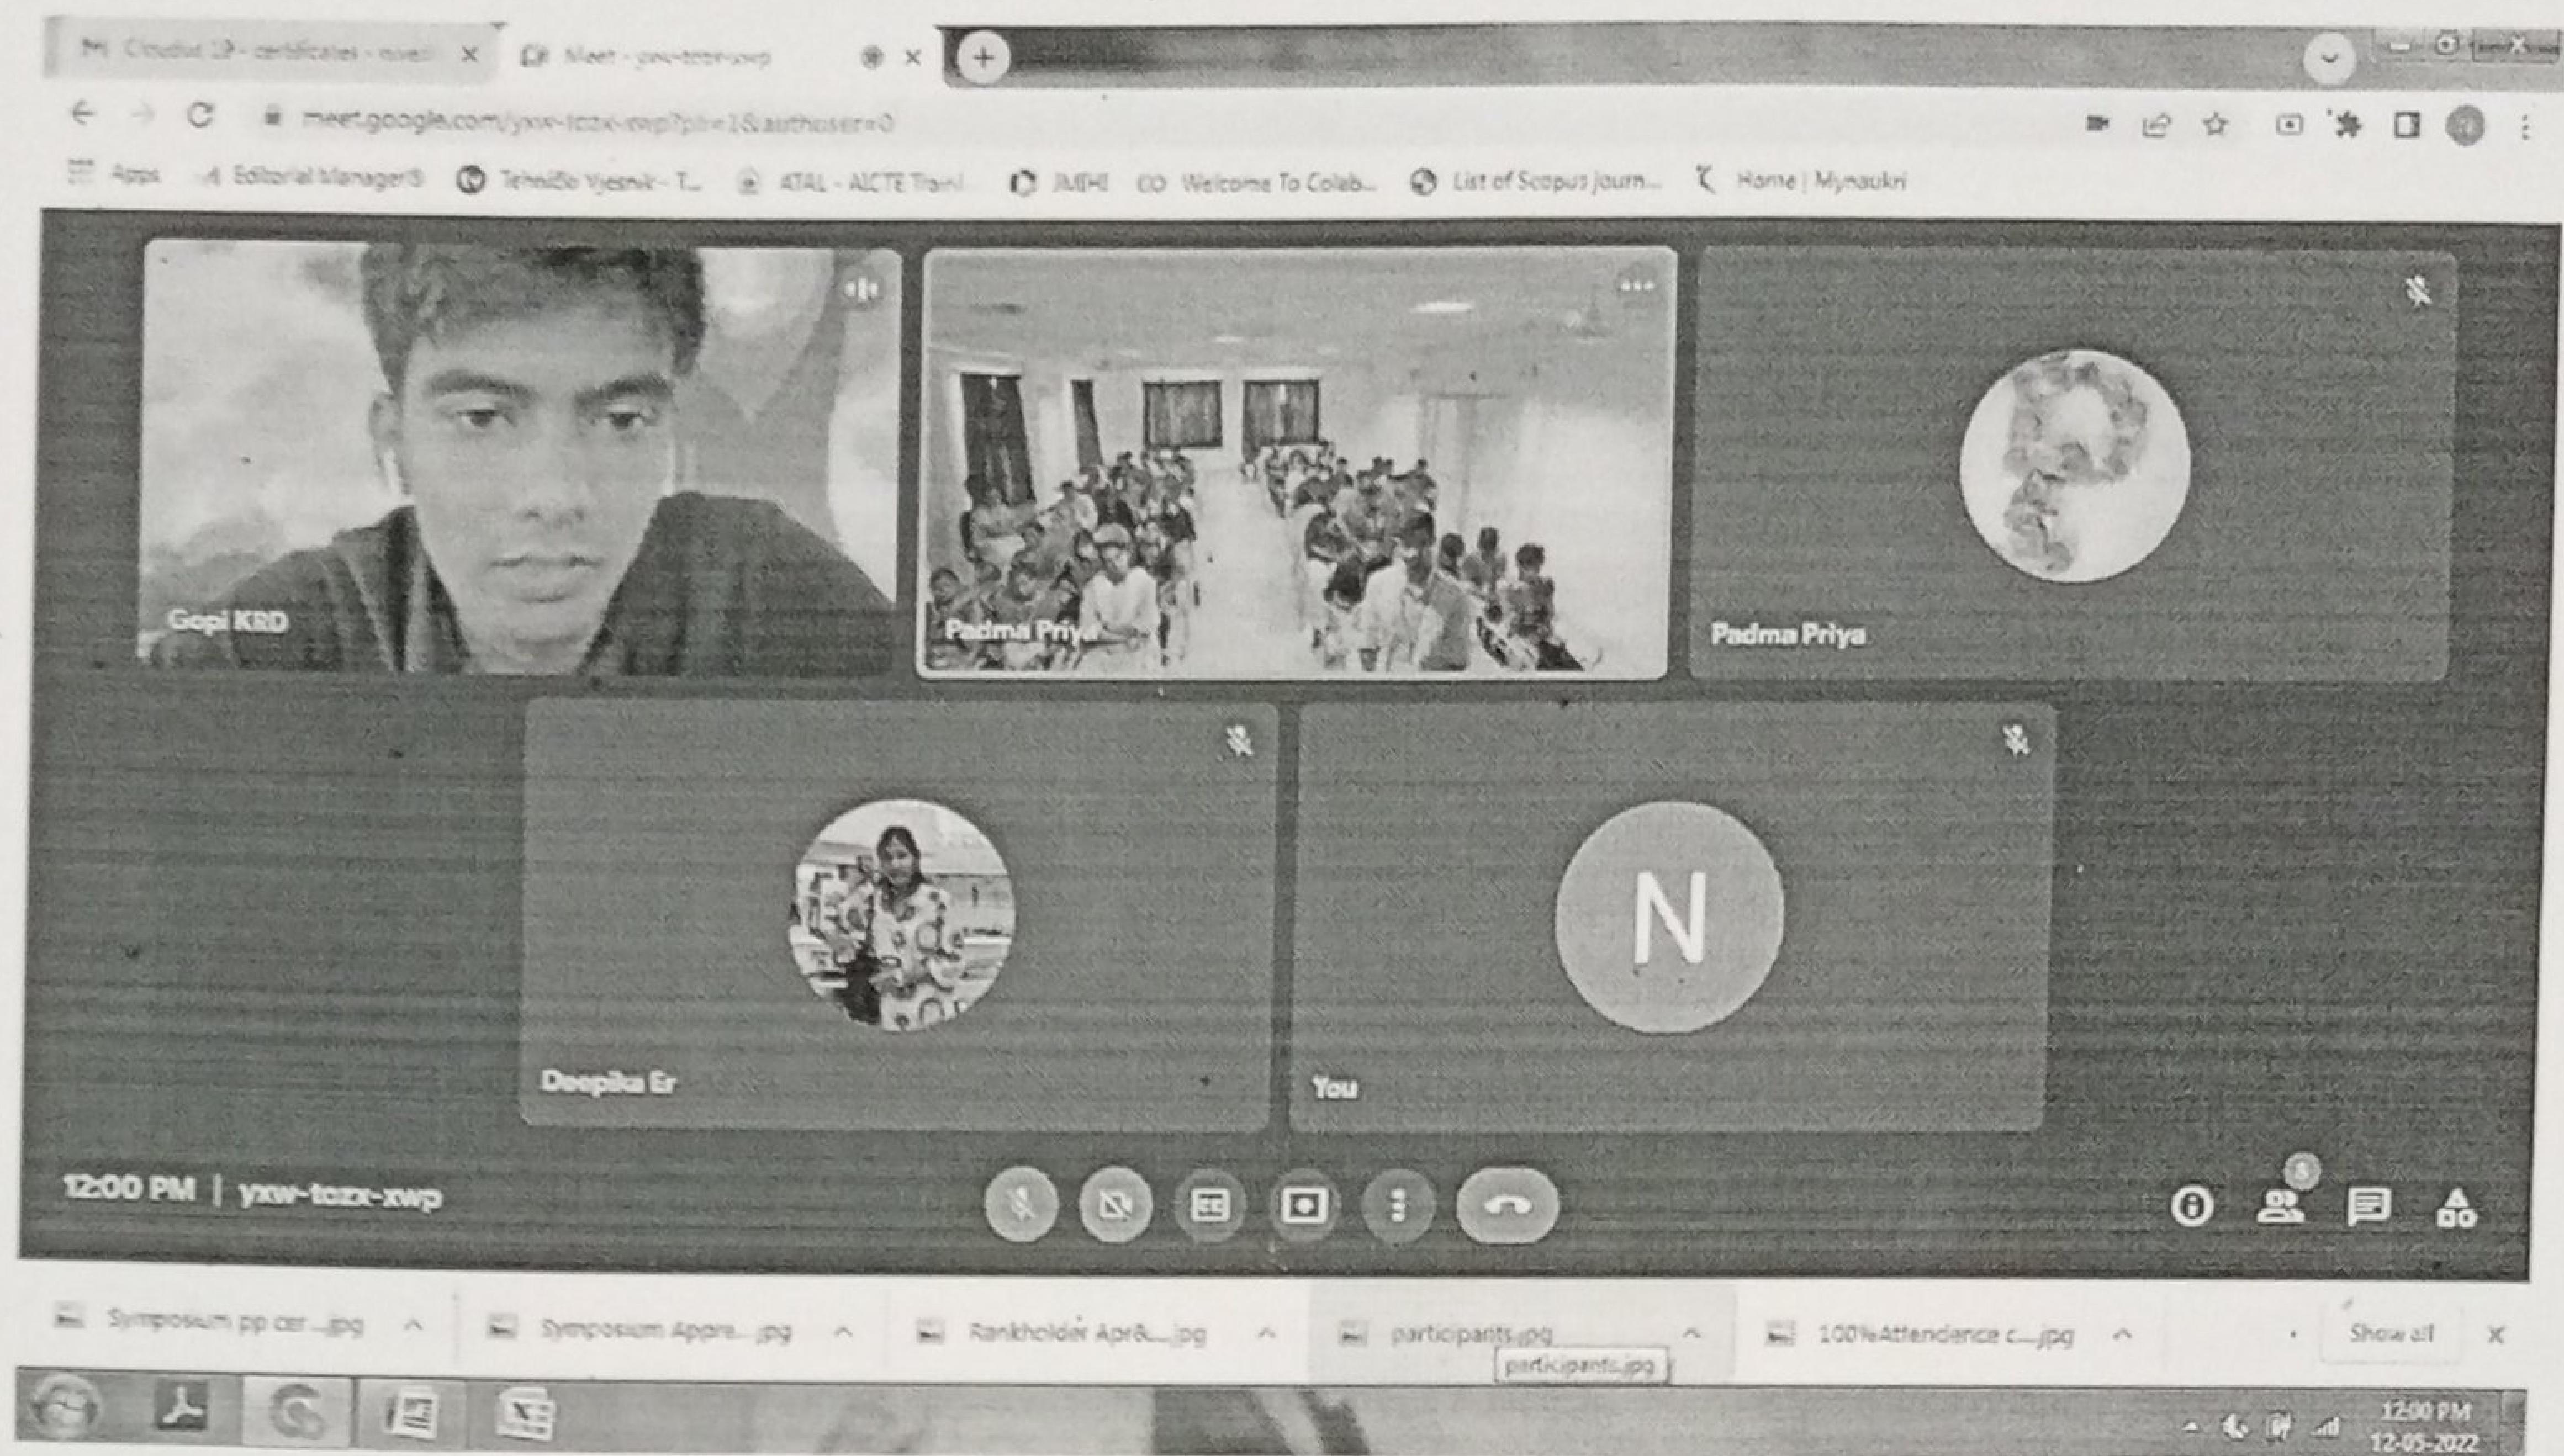

Students Doubts Clarification – Madhumitha, III CSE

Demo Session of his current Project

Vote of thanks by Ms.N.Padmapriya,AP/CSE
