**WEBINAR  
ON  
"MACHINE LEARNING AND ITS APPLICATIONS"**

**Date: 16-05-2020**

**Session Timings: 11 A.M to 12 P.M**

The session was handled by Dr. N. Krishnaraj., PhD., MISTE, Professor & Head, Department of CSE, SASI Institute of Technology and Engineering (Autonomous), Tadepalligudem, Andhra Pradesh. The session started with introduction about machine learning and he explained various application fields of machine learning in day today life.

He gave brief introduction on machine learning. ie. Artificial intelligence is the father of machine learning and it plays important role in decision making based on data inputs. Machine learning mainly focuses on the development of computer programs that can access data and use it learn for themselves.

He also explained real time examples of machine learning in medical diagnosis, image processing, prediction, classification, learning association, regression with pictures and also explained use of machine learning in industries.

Machine learning is a sub-field of Artificial intelligence. So for decision making process neurons are trained with algorithms. The basic knowledge about Machine Learning and its applications has been taught by him and he took k-means algorithm as training algorithm to train neural network and pictorial representation given to students for decision making in finding tumor in medical diagnosis application.

Types of Machine learning and advantages of using machine learning instead of deep learning was discussed finally.
